# Lesson 5&6: Communicating responsibly

Year 6 – Computing systems and networks – Communication and collaboration

National Centre for Computing Education

Raspberry Pi

Communicating

- A message
- From someone, to someone (for example, a speaker and a listener)
- Taking turns
- Understanding (same language)

You have already learned that computers follow **protocols** to communicate with each other. Similarly, humans follow **protocols** when they communicate.

Communicating using the internet

How can you communicate using the internet?

List as many ways as you can think of.

Public or private?

Think: What do the words below mean?
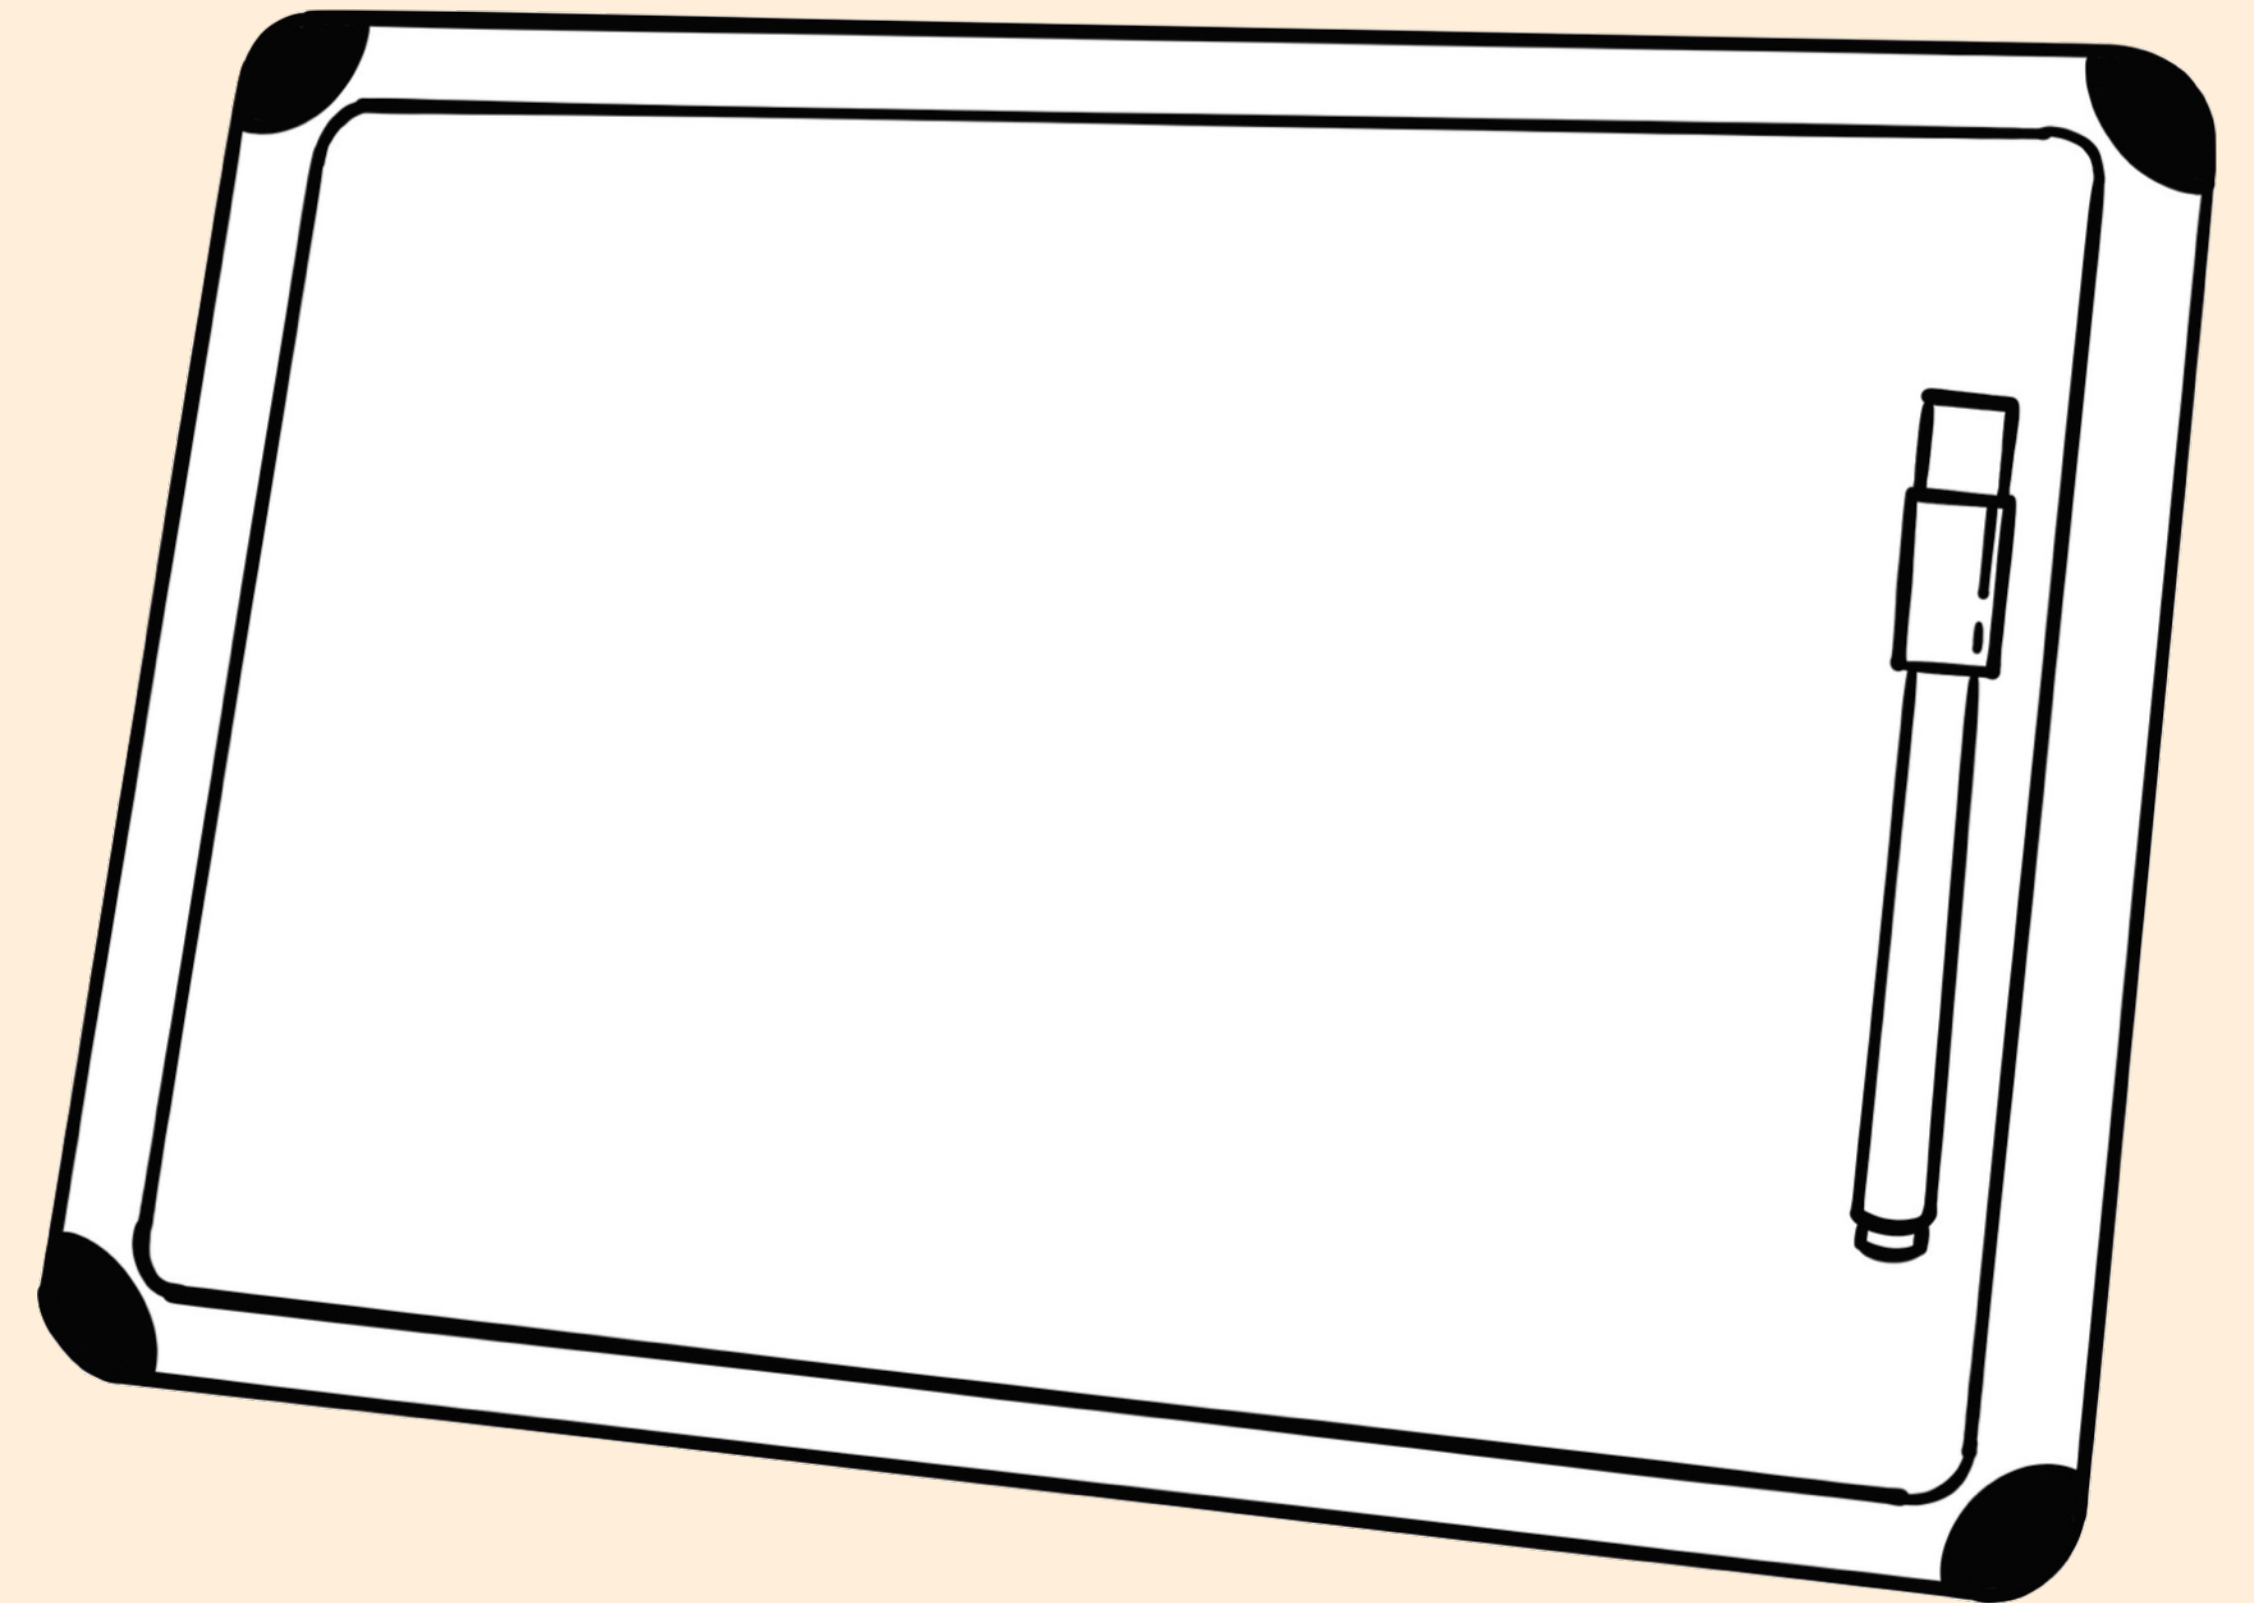

Public

Private

Communicating using the internet

Are they public or private?

How to communicate

On your exit ticket, list the three most important things that you should consider when choosing how to communicate with other people using the internet.

1.

2.

3.
